Art Unit: 1732

DETAILED ACTION

Response to Amendment

1. Applicant's reply filed April 18, 2003 (Paper No. 6) has been entered.

However, it has been noticed that claims 47-50 have not been included in the restriction requirement mailed March 12, 2003 (Paper No. 5). As such, in order to provide a clear record, the restriction requirement mailed March 12, 2003 (Paper No. 5) has been withdrawn and a new restriction requirement follows as shown below.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33 and 45-50, drawn to a molding method, classified in class 264, subclass 258.
 - II. Claims 34-37, drawn to a molding apparatus, classified in class 425, subclass 503.
 - III. Claims 38-44 and 51-53, drawn to a wheel rim, classified in class 301, subclass 95.103.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as, wrapping a fiber reinforced *thermoplastic* material around an inflatable bladder and further

Page 3

Application/Control Number: 10/073,411

Art Unit: 1732

wrapping a core around said fiber reinforced thermoplastic material to form a wrapped assembly, placing said wrapped assembly in a mold cavity, melting said thermoplastic material while inflating said bladder to bond said fiber reinforced thermoplastic material and said core and, removing said inflatable bladder to form a hollow composite article.

- 4. Inventions Group I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as separately forming a first part with a cavity and a second part having two circumferential wings and bonding said first and second parts using an adhesive positioned therebetween to form an integral rim of a bicycle wheel.
- 5. Inventions Group I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the product as claimed can be made by another and materially different apparatus such as a heating press that holds and presses a first part with a cavity and a second part having two circumferential wings for adhesively bonding said first and second parts into an integral rim of a bicycle wheel.

Application/Control Number: 10/073,411

Art Unit: 1732

6. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Stefan Staicovici, Ph.D. whose telephone number is (703) 305-

0396. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30 PM and

alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Richard D. Crispino, can be reached at (703) 308-3853. The fax phone number for

this Group is (703) 305-7718.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the Group receptionist whose telephone number is (703) 308-0661.

Stefan Staicovici, PhD
